

# Interface Test Plan

EDI 270/271 Eligibility · Generated 2026-08-13 from plan.json

This plan is the source of truth for automated verification. Run **python3 tools/run\_interface\_tests.py** to execute it and write **documents/test-results.json**, HTML, and PDF. Update **tests/plan.json** as capabilities are added so the PDF and runner stay aligned.

## 1. Purpose

Clinic 270 build, mock payer 271, AAA theater then active benefits.

## 2. Environments & base URLs

| Key   | URL                       |
|-------|---------------------------|
| webui | http://127.0.0.1:8107     |
| eip   | http://127.0.0.1:8106/eip |
| payer | http://127.0.0.1:8210     |

- http://127.0.0.1:8107/
- http://127.0.0.1:8107/api/health

## 3. Test suites

### Health

- **Web UI loads** (ui → expect HTTP 200)
- **API health** (http → expect HTTP 200)
- **Routes API** (http → expect HTTP 200)

### 270/271 story

- **EIP is reachable** (wait)
- **Mock payer is reachable** (wait)
- **FAIL001 AAA reject** (http → expect HTTP 200)
- **OK001 active benefits** (http → expect HTTP 200)

### Documents

- **Route PDF on disk** (file)
- **Capability Brief PDF on disk** (file)
- **Test Plan PDF on disk** (file)

## 4. How to run

From the interface root (stack up):

```
python3 tools/run_interface_tests.py --wait
```

Watch mode (re-run on DESIGN/routes/samples/plan changes):

```
python3 tools/run_interface_tests.py --watch
```

After compose:

```
docker compose up -d --build && ./tools/post_up_tests.sh
```

*Results appear in the Web UI Tests tab, and as documents/test-results.html (easy pass/fail list) plus documents/test-results.json.*
