

Interface Test Plan

EDI 270/271 Realtime Eligibility · Generated 2026-08-13 from plan.json

This plan is the source of truth for automated verification. Run **python3 tools/run_interface_tests.py** to execute it and write **documents/test-results.json**, HTML, and PDF. Update **tests/plan.json** as capabilities are added so the PDF and runner stay aligned.

1. Purpose

Single sync REST eligibility check: PF builds 270, posts payer, parses 271.

2. Environments & base URLs

Key	URL
webui	http://127.0.0.1:8121
eip	http://127.0.0.1:8120/eip
payer	http://127.0.0.1:8211

- http://127.0.0.1:8121/
- http://127.0.0.1:8121/api/health

3. Test suites

Health

- **Web UI loads** (ui → expect HTTP 200)
- **API health** (http → expect HTTP 200)
- **Routes API** (http → expect HTTP 200)

Realtime check

- **EIP is reachable** (wait)
- **Mock payer is reachable** (wait)
- **FAIL001 AAA via single /check** (http → expect HTTP 200)
- **OK001 benefits via single /check** (http → expect HTTP 200)
- **Web UI single-call orchestration** (http → expect HTTP 200)

Documents

- **Route PDF on disk** (file)
- **Capability Brief PDF on disk** (file)
- **Test Plan PDF on disk** (file)
- **Orig vs realtime PDF on disk** (file)

4. How to run

From the interface root (stack up):

```
python3 tools/run_interface_tests.py --wait
```

Watch mode (re-run on DESIGN/routes/samples/plan changes):

```
python3 tools/run_interface_tests.py --watch
```

After compose:

```
docker compose up -d --build && ./tools/post_up_tests.sh
```

Results appear in the Web UI Tests tab, and as documents/test-results.html (easy pass/fail list) plus documents/test-results.json.
