

Interface Test Plan

EDI 278 Prior Auth · Generated 2026-08-13 from plan.json

This plan is the source of truth for automated verification. Run **python3 tools/run_interface_tests.py** to execute it and write **documents/test-results.json**, HTML, and PDF. Update **tests/plan.json** as capabilities are added so the PDF and runner stay aligned.

1. Purpose

Directory-drop 278, AuthCatalog completeness, decision buckets, 278 response, EHR ORU.

2. Environments & base URLs

Key	URL

4. How to run

From the interface root (stack up):

```
python3 tools/run_interface_tests.py --wait
```

Watch mode (re-run on DESIGN/routes/samples/plan changes):

```
python3 tools/run_interface_tests.py --watch
```

After compose:

```
docker compose up -d --build && ./tools/post_up_tests.sh
```

Results appear in the Web UI Tests tab, and as documents/test-results.html (easy pass/fail list) plus documents/test-results.json.
