

Interface Test Plan

FHIR Patient Exchange · Generated 2026-08-05 from plan.json

This plan is the source of truth for automated verification. Run **python3 tools/run_interface_tests.py** to execute it and write **documents/test-results.json** + HTML. Update **tests/plan.json** as capabilities are added so the PDF and runner stay aligned.

1. Purpose

FHIR REST Patient create/read with validation kickout sample.

2. Environments & base URLs

Key	URL
webui	http://127.0.0.1:8103
fhir	http://127.0.0.1:8102/eip/rest/fhir

- <http://127.0.0.1:8103/>
- <http://127.0.0.1:8102/eip/rest/fhir/metadata>

3. Test suites

Health

- **Web UI loads** (ui → expect HTTP 200)
- **FHIR metadata** (http)
- **Routes API** (http → expect HTTP 200)

Patient CRUD

- **Create Patient alice** (http → expect body markers)
- **Read pat-alice-001** (http → expect HTTP 200)

4. How to run

From the interface root (stack up):

```
python3 tools/run_interface_tests.py --wait
```

Watch mode (re-run on DESIGN/routes/samples/plan changes):

```
python3 tools/run_interface_tests.py --watch
```

After compose:

```
docker compose up -d --build && ./tools/post_up_tests.sh
```

Results appear in the Web UI Tests tab, and as documents/test-results.html (easy pass/fail list) plus documents/test-results.json.
