

Interface Test Plan

HL7, EDI & FHIR Data Integration for Analytics & Reporting · Generated 2026-09-02 from plan.json

This plan is the source of truth for automated verification. Run **python3 tools/run_interface_tests.py** to execute it and write **documents/test-results.json**, HTML, and PDF. Update **tests/plan.json** as capabilities are added so the PDF and runner stay aligned.

1. Purpose

HL7 ADT over LLP to SQL PATIENT and JSON analytics (public healthcare reporting demo).

2. Environments & base URLs

Key	URL
webui	http://127.0.0.1:8154
eip	http://127.0.0.1:8153/eip

- http://127.0.0.1:8154/
- http://127.0.0.1:8154/api/health

3. Test suites

Health

- **Web UI loads** (ui → expect HTTP 200)
- **API health** (http → expect HTTP 200)

ADT to SQL and JSON

- **Send sample ADT over LLP** (http → expect HTTP 200)
- **SQL row has BUNNY / BUGS** (http → expect HTTP 200)

FHIR Patient to SQL

- **POST sample FHIR Patient** (http → expect HTTP 200)
- **SQL row has Chalmers** (http → expect HTTP 200)

837 over FTP to SQL

- **Drop sample 837 on FTP** (http → expect HTTP 200)
- **SQL row has billing provider Kildare** (http → expect HTTP 200)

4. How to run

From the interface root (stack up):

```
python3 tools/run_interface_tests.py --wait
```

Watch mode (re-run on DESIGN/routes/samples/plan changes):

```
python3 tools/run_interface_tests.py --watch
```

After compose:

```
docker compose up -d --build && ./tools/post_up_tests.sh
```

Results appear in the Web UI Tests tab, and as documents/test-results.html (easy pass/fail list) plus documents/test-results.json.
