

Interface Capability Brief

CSV SFTP To SQL · Stakeholder overview · 2026-08-12

1. Executive summary

Poll a CSV file from an SFTP directory, stage it locally, parse rows (CSV→XML Dialect A), and insert into SQL Server dbo.CsvPatients.

2. Who this is for

- Trading partner / ops drop CSV on SFTP (demo / demo, dir upload) - PilotFish eiPlatform (23R1) - SQL Server 2022 (CsvSftpDemo)

- Trading partner / ops drop CSV on SFTP (demo / demo, dir upload)
- PilotFish eiPlatform (23R1)
- SQL Server 2022 (CsvSftpDemo)

3. What the interface can do

Capabilities below are drawn from the working design and, when present, the published CapabilityStatement — not from aspirational roadmap items.

Integration highlights

Stage	Module	FQCN
SFTP poll	FTP / SFTP Listener (JSCH)	com.pilotfish.eip.modules.file.ftp.FTPListener
Archive raw	File Writing	com.pilotfish.eip.modules.file.FileWriteProcessor
Stage	Directory / File Transport	com.pilotfish.eip.modules.file.DirectoryTransport
Local poll	Directory / File Listener	com.pilotfish.eip.modules.file.DirectoryListener
CSV parse	CSV	com.pilotfish.eip.modules.transform.CSVTransformationProcessor
Map SQLXML	XSLT	com.pilotfish.eip.modules.transform.XSLTProcessor
Insert	Database (SQL) Transport	com.pilotfish.eip.modules.db.DatabaseSqlTransport

4. Honest boundaries (not claimed yet)

- JSCH requires mounted sftp/sshd_config (algorithm negotiation)
- Demo SA password is for local sandbox only
- DateOfBirth cast relies on ISO YYYY-MM-DD in CSV

5. What you can verify in a walkthrough

Use these as checklist items when reviewing the demo with business stakeholders. They describe outcomes, not module names.

-
- Exercise route “1 - SFTP Poll And Stage” from the Web UI or documented smoke path
 - Exercise route “2 - CSV To SQL” from the Web UI or documented smoke path
 - Confirm outputs land in the documented folders / queues and appear in the Web UI status views

6. How it works (plain language)

Routes in this interface

Each route is a configured PilotFish flow. Technical wiring appears in the Route Diagrams PDF; here is the stakeholder reading.

- 1 - SFTP Poll And Stage: runs steps such as Poll SFTP for CSV, Archive Raw CSV, Write Staged CSV.
- 2 - CSV To SQL: runs steps such as Poll Staged CSV, CSV to XML, Map CSV XML To SQLXML, Insert Patients SQL.

7. Security & trust posture

- Credentials and passwords in this package are demo-only — not production secrets

8. Seeing it work

- - Web UI: `http://localhost:8133/` - LAN: `http://192.168.68.62:8133/` - EIP: `http://localhost:8132/eip/` - SFTP: `localhost:2224 (demo/demo, upload/)` - SQL Server: `localhost:14341 (sa / PilotFish_Demo1!)`
- `docker compose --profile full up -d --build`
- open `http://localhost:8133/`

9. Related technical documents

- DESIGN.md — working engineering specification for this interface
- README.md — how to run, ports, and smoke commands
- This Capability Brief — shareable stakeholder summary (regenerate after design changes)

This document is generated from the interface sources listed above. If design and runtime diverge, believe the smoke-tested runtime and update DESIGN.md.
