

Interface Test Plan

EDI 837 NCCI PTP · Generated 2026-08-13 from plan.json

This plan is the source of truth for automated verification. Run **python3 tools/run_interface_tests.py** to execute it and write **documents/test-results.json**, HTML, and PDF. Update **tests/plan.json** as capabilities are added so the PDF and runner stay aligned.

1. Purpose

Directory-drop 837P, PTP pair lookup, pass vs kickout.

2. Environments & base URLs

Key	URL
webui	http://127.0.0.1:8133
eip	http://127.0.0.1:8132/eip

- http://127.0.0.1:8133/
- http://127.0.0.1:8133/api/health

3. Test suites

Health

- **Web UI loads** (ui → expect HTTP 200)
- **API health** (http → expect HTTP 200)
- **Routes API** (http → expect HTTP 200)

PTP scoring

- **SQL is reachable** (wait)
- **EIP is reachable** (wait)
- **PTP catalog seeded** (wait)
- **Reset then drop sample 837P** (http → expect HTTP 200)
- **Inject sample 837P** (http → expect HTTP 200)
- **PTPCLM001 single code pass** (wait)
- **PTPCLM002 pair without modifier** (wait)
- **PTPCLM003 pair with modifier 59** (wait)
- **PTPCLM004 indicator 0 even with 59** (wait)

Documents

- **Route PDF on disk** (file)
- **Capability Brief PDF on disk** (file)
- **Test Plan PDF on disk** (file)

4. How to run

From the interface root (stack up):

```
python3 tools/run_interface_tests.py --wait
```

Watch mode (re-run on DESIGN/routes/samples/plan changes):

```
python3 tools/run_interface_tests.py --watch
```

After compose:

```
docker compose up -d --build && ./tools/post_up_tests.sh
```

Results appear in the Web UI Tests tab, and as documents/test-results.html (easy pass/fail list) plus documents/test-results.json.
