

# Interface Capability Brief

HL7 Healthcare Integration Automation Demo · Stakeholder overview · 2026-08-05

## 1. Executive summary

HL7 Healthcare Integration Automation Demo is a PilotFish demo interface that integrates systems using configurable listeners, processors, and transports. This brief summarizes what it can do today for stakeholders.

## 2. Who this is for

- Business / clinical stakeholders evaluating whether the integration covers needed workflows
- Solution architects comparing PilotFish capabilities to project requirements
- Demo audiences walking the happy-path in the Web UI

## 3. What the interface can do

*Capabilities below are drawn from the working design and, when present, the published CapabilityStatement — not from aspirational roadmap items.*

## 4. Honest boundaries (not claimed yet)

- Production hardening (HA, disaster recovery, full audit workflows) is outside this demo brief
- Anything not listed in §3 should be treated as future work unless confirmed in DESIGN.md

## 5. What you can verify in a walkthrough

*Use these as checklist items when reviewing the demo with business stakeholders. They describe outcomes, not module names.*

- Exercise route “1 - Process Hospital HL7” from the Web UI or documented smoke path
- Confirm outputs land in the documented folders / queues and appear in the Web UI status views

## 6. How it works (plain language)

### Routes in this interface

*Each route is a configured PilotFish flow. Technical wiring appears in the Route Diagrams PDF; here is the stakeholder reading.*

1 - Process Hospital HL7: runs steps such as Hospital HL7 Feed, Archive Inbound Envelope, Basic Validation, Split Batch.

## 7. Security & trust posture

- Treat this as a controlled demo environment unless a production security review is completed
- Network exposure should remain on the lab / LAN ports documented in DESIGN.md

## 8. Seeing it work

- `docker compose up -d --build`
- - Web UI: `http://localhost:8097/`
- - PilotFish EIP: `http://localhost:8096/eip/`
- `docker compose logs -f pilotfish`

- 
- `docker compose exec sqlserver /opt/mssql-tools18/bin/sqlcmd \`
  - `-S localhost -U sa -P 'PilotFish_Demo1!' -C -d HL7AutomationDemo \`
  - `docker compose down -v`

## 9. Related technical documents

- DESIGN.md — working engineering specification for this interface
- README.md — how to run, ports, and smoke commands
- HL7\_V2\_Route\_Diagrams.pdf — detailed PilotFish route wiring diagrams
- This Capability Brief — shareable stakeholder summary (regenerate after design changes)

*This document is generated from the interface sources listed above. If design and runtime diverge, believe the smoke-tested runtime and update DESIGN.md.*
