

Interface Test Plan

FTP Named Download Trigger · Generated 2026-08-12 from plan.json

This plan is the source of truth for automated verification. Run **python3 tools/run_interface_tests.py** to execute it and write **documents/test-results.json**, HTML, and PDF. Update **tests/plan.json** as capabilities are added so the PDF and runner stay aligned.

1. Purpose

Control file names a remote SFTP object; Listener Trigger fires a separate FTP Listener route to download it (no FTP Operation Download).

2. Environments & base URLs

Key	URL
webui	http://127.0.0.1:8113
eip	http://127.0.0.1:8112/eip

- <http://127.0.0.1:8113/>
- <http://127.0.0.1:8113/api/health>

3. Test suites

Health

- **Web UI loads** (ui → expect HTTP 200)
- **API health** (http → expect HTTP 200)
- **Routes API** (http → expect HTTP 200)

Named download

- **Ensure remote payload on SFTP seed** (file)
- **Copy control file into inbound** (shell)
- **Named file appears in downloaded** (file)
- **Decoy was not downloaded** (shell)

Documents

- **Route PDF on disk** (file)
- **Capability Brief PDF on disk** (file)

4. How to run

From the interface root (stack up):

```
python3 tools/run_interface_tests.py --wait
```

Watch mode (re-run on DESIGN/routes/samples/plan changes):

```
python3 tools/run_interface_tests.py --watch
```

After compose:

```
docker compose up -d --build && ./tools/post_up_tests.sh
```

Results appear in the Web UI Tests tab, and as documents/test-results.html (easy pass/fail list) plus documents/test-results.json.
